An Important Message from Mayor Annette Iafallo – Confirmed Covid-19 Case in Lackawanna

At 12:20 pm today, March 22, I was notified by County Executive Mark Poloncarz that a resident of Lackawanna has tested positive for Covid-19 (coronavirus). As this virus continues to impact Western New York, unfortunately a call like this was inevitable. More information will be provided by as it becomes available.

I encourage everyone to PLEASE follow the recommended precautions and restrictions communicated by the Department of Health, most notably hygiene factors such as regular hand washing and practicing social distancing. Unless absolutely necessary please stay home. It is important that every resident and business comply with these and other precautions which have been implemented to help control the spread of coronavirus.

My sincere thanks to County Executive Poloncarz for his timely and open communication on this matter. We appreciate the hard work and commitment in county government to keep the citizens of Erie County educated and informed on coronavirus. Again, we will share more information as it becomes available.

Stay Home. Stay Safe. And, God Bless.

Annette
